

Darcy Rose

Role	Lead Story & Content Architect
Core Responsibilities	1. Storyline Development: Wrote the complete narrative structure and content. 2. Universal Class Creation: Developed the foundational CSS classes for background and text layouts to ensure visual consistency. 3. Accessibility Contribution: Completed fifty percent (50%) of the required Image Alt Text (Alts) descriptions.
Project Contribution Summary	Darcy was the creative backbone of the project, providing the entire storyline that dictated the project's scope and structure. Their technical contribution was essential in setting the visual foundation and consistency across all pages by creating the universal background and text CSS classes. The alt text contributions also ensured the project met key accessibility standards from the outset.
Working with Darcy	Working with Darcy was efficient and creatively stimulating. She provided clear and complete content, which allowed the design and development teams to proceed with confidence. Darcy was highly receptive to feedback, particularly regarding the technical limitations of the design, ensuring the story and technical implementation remained in sync.

Isaias Gonzalez

Role	Readability & User Interface (UI) Stylist
Core Responsibilities	1. Styles and Readability Edits: Implemented CSS and HTML adjustments focused on maximizing the narrative's readability across various screen sizes and devices. 2. Link Button Design: Designed and styled all interactive link buttons to be visually distinct, intuitive, and consistent with the project's aesthetic.
Project Contribution Summary	Isaias was instrumental in shaping the user experience (UX) of the narrative. Their focus on readability and aesthetic styling ensured the final product was not only functional but also engaging and comfortable for users to read. The dedicated work on button designs provided the critical interactive elements necessary for users to navigate the story paths smoothly.
Working with Isaias	Isaias has an excellent eye for detail, particularly in typography and spacing, which elevated the overall professionalism of the project. Their work was meticulous and required minimal revision. He was a collaborative partner, often proposing creative solutions to tricky styling issues that benefited the entire team.

Sammer Saqa

Role	Technical Production & Media Lead
Core Responsibilities	<p>1. HTML Page Construction: Created and structured every individual HTML page required for the branching narrative. 2. Media Generation: Generated all custom images used throughout the pages to visualize the narrative scenes. 3. Accessibility Contribution: Completed fifty percent (50%) of the required Image Alt Text (Alts) descriptions. 4. Project Management: Authored the final project responsibilities document (this PDF).</p>
Project Contribution Summary	<p>Sammer took charge of the core technical scaffolding by building all the HTML pages, providing the structural container for the storyline and styles. As the Media Lead, they ensured the project had high-quality, relevant images to enhance immersion. This dual role of development and media creation, coupled with the important task of project documentation, made Sammer a vital, multi-faceted contributor.</p>
Working with Sammer	<p>Sammer demonstrated strong organizational skills, especially in managing the numerous HTML files and media assets. His ability to deliver both the technical framework and the visual content allowed the project to advance quickly and coherently. He were reliable and proactive in communicating progress and identifying potential workflow bottlenecks.</p>
